PROFESSIONAL SUMMARY

Senior Software Engineer with **8+ years** delivering production-grade enterprise systems across **fintech, logistics, retail, healthcare, and government**. Specialized in **SAP Business One integrations, event-driven architectures, and multi-tenant SaaS platforms** — with proven track record of solo-leading complex enterprise builds from architecture through production deployment. *National award winner (2nd place, 3rd Crown Prince Award for Best Government Services Application, 2024).*

KEY ACHIEVEMENTS

- ▶  **Crown Prince Award (2024):** 2nd place (30,000 JOD prize) in the 3rd Crown Prince Award for Best Government Services Application — "Masar" university guidance platform.
- ▶ **Enterprise SAP B1 Integrations:** Delivered multiple production SAP B1 integration platforms including a bi-directional Omnifur ↔ SAP B1 sync processing 13,000+ webhooks/day for DKHOUN (Tadawul-listed company).
- ▶ **Co-Founder, Trio Apps (Egypt):** Co-founded a software product studio in Cairo; solo-delivered 8 production-grade enterprise products in 6 months across SAP integrations, multi-tenant SaaS, ride-hailing, and restaurant tech.
- ▶ **High-Profile Clients:** Delivered systems for BEON-IT (SAP Gold Partner), Al Rajhi Bank (largest Islamic bank globally), Empower Kuwait, Medical Hub (Jordan), DKHOUN (Tadawul-listed), and Pick restaurant chain (Kuwait).

TECHNICAL SKILLS

Backend	Laravel/PHP, ASP.NET Core (C#), Node.js, Express, Hangfire, Entity Framework, Dapper
Mobile & Frontend	Flutter (GetX, Clean Architecture), React, Next.js, Angular + DevExpress, React Native, TypeScript
Databases	PostgreSQL (incl. PostGIS), MySQL, SQL Server 2019, MongoDB, Redis, SAP HANA
ERP & Integrations	SAP Business One (Service Layer, DI-API, HANA), UAE E-Invoicing, OAuth2, Webhooks, Magento 2
Architecture	Microservices, Event-Driven (RabbitMQ, Redis Queues), Multi-Tenant SaaS, API Gateways, Idempotency & DLQ Strategies, Clean Architecture
DevOps & Cloud	Docker, Kubernetes (AKS/EKS/GKE), Azure DevOps, CI/CD, Application Insights, Prometheus, Grafana, ELK
AI & Productivity	OpenAI GPT-4 API (production integration), AI-augmented engineering workflows, Claude Code, prompt engineering

PROFESSIONAL EXPERIENCE

- Senior Software Developer

Intelliconz • Riyadh, Saudi Arabia (Remote)

May 2026 – Present
- ▶ Full-stack engineering across backend, mobile, and AI-powered analytics products, with a strong focus on SAP Business One integrations.

- **AIBI — AI Business Intelligence Dashboard** — Real-time analytics dashboard powered by SAP Business One with GPT-4-driven auto-analysis and insights for enterprise clients. Live: aibi.intelliconz.com [[React](#), [Next.js](#), [OpenAI GPT-4](#), [SAP B1 Service Layer](#)]

Co-Founder & Technical Lead

Oct 2025 – Apr 2026

Trio Apps IT Solutions • Cairo, Egypt

- Co-founded a software product studio and solo-led the technical delivery of 8 production-grade products in 6 months, including enterprise SAP B1 integrations for SAP Gold Partner BEON-IT.
- Scope spanned multi-tenant SaaS, ride-hailing, two-sided marketplaces, school management, manufacturing systems, and bi-directional ERP integrations.

Client Engagements — BEON-IT (SAP Gold Partner):

- **Omniful ↔ SAP B1 Integration** — Bi-directional production integration for DKHOUN National Trading (Tadawul-listed company, ticker 9635.SR). Syncs Items, Orders, Inventory, and Financial data across systems. Webhook-driven, processing 13,000+ events/day. [[Laravel](#), [MySQL](#), [Redis Queues](#), [SAP B1 Service Layer](#)]
- **IGW — Foodics POS ↔ Talabat Integration Platform** — Multi-tenant integration-as-a-service platform connecting Foodics POS to Talabat across the GCC. Multi-account support per customer, OAuth2 + Bearer auth, idempotency strategy, DLQ retry queues, Hangfire-scheduled menu/availability sync. First production client: Pick restaurant chain (Kuwait). Live: igw.beon-it.com [[ASP.NET Core](#), [PostgreSQL 16](#), [RabbitMQ](#), [Redis](#), [Hangfire](#), [Docker](#), [Kubernetes](#)]
- **WMS — Warehouse Management Product** — Full warehouse management product for SAP B1 customers. 7 modules including Purchasing, Outbound Deliveries, Inventory, Production, Counting, Reports + 17 enhancements (Multi-stage Approvals, Dynamic Barcode Parser, Transfer Sending/Receiving with in-transit logic, Stock Counting Templates). [[Angular](#), [ASP.NET Core](#), [SAP B1 Service Layer \(OData/REST\)](#)]
- **Form Builder & Document Engine** — Enterprise document & workflow engine delivered to production in 4.5 months as sole technical owner. 10 phases covering authentication, dynamic form builder, document types, submission engine, multi-stage workflows & approvals, notifications, SAP B1 integration, and full QA/deployment. [[ASP.NET Core](#), [Angular + DevExpress](#), [SQL Server 2019](#), [SAP HANA](#), [Entity Framework](#), [Dapper](#), [JWT](#), [Azure DevOps](#)]

In-House Products (Trio Apps):

- **Kanz — Ride-Hailing Platform** — End-to-end ride-hailing platform: 2 mobile apps (Rider + Driver), admin dashboard, real-time matching engine, geospatial trip lifecycle. Live on Google Play (com.trioapps.kanzrider, com.trioapps.kanzdriver). [[Node.js](#), [React](#), [Flutter](#), [PostgreSQL \(PostGIS\)](#), [Redis](#)]
- **Tawletak — Restaurant Reservations Marketplace** — Two-sided marketplace for premium restaurant reservations (500+ restaurants, 100K+ reservations). Consumer app + Restaurant partner portal with real-time table management, floor plans, predictive analytics, rewards system. Live on App Store & Google Play. [[Flutter](#), [Laravel](#), [MySQL](#)]
- **Trio Schools — School Management SaaS** — Multi-tenant school management platform with 8+ language support. Modules: courses, events, attendance, exam scheduling, noticeboard, tuition fees, parent communications. Live: trio-schools.com [[Laravel](#), [Flutter](#), [MySQL](#)]
- **Production Lines Management System** — Manufacturing operations system for production line tracking, throughput monitoring, and shop-floor data capture. [[Node.js](#), [Vite](#), [JavaScript](#)]

Full-Stack Software Engineer

Nov 2021 – Feb 2025

Zinutech • Amman, Jordan

- Delivered end-to-end web and mobile platforms for clients across Jordan, Saudi Arabia, Kuwait, and the UAE. Built integrated systems combining customer-facing applications with admin dashboards, B2B portals, and ERP/accounting integrations.
- **Medical Hub — Healthcare Marketplace Platform (Flagship)** — "First and only platform serving healthcare stakeholders in the Jordanian market." Designed and built 7 interconnected systems: public website, admin dashboard, hospital portal, merchant portal, e-commerce mobile app, manufacturers system, and internal accounting system. Company valued at ~\$5.8M with ~\$1.8M annual revenue. [[Laravel](#), [Flutter](#), [MySQL](#)]
- **Arab Investor Awards (Dubai)** — Complex dynamic form builder system for prestigious regional business awards. Built nomination workflows, multi-stage judging, and dashboards. Site: arabinvestoraward.com [[Laravel](#), [JavaScript](#)]

- ▶ **Almujadamy Marine Rescue (Kuwait, via Empower Kuwait)** — Marine vessel management system with real-time IoT integration across 3 onboard devices for fleet tracking, alerts, and incident management. Delivered under Empower Kuwait (clients incl. Gulf Bank, Jazeera Airways, Pizza Hut, Burger King, Subway). [[Laravel](#), [Flutter](#), [IoT integration](#)]
- ▶ **Government Marketplace ("Souq Al-Jumaa")** — Resolved long-standing production issues inherited from prior teams; completed national identity verification integration that earlier vendors had failed to deliver. [[ASP.NET](#) [Web Forms](#)]
- ▶ **Additional Platforms** — Echo Sport (real-time live sports platform), Recyc (recycling rewards platform with points system), Shashati (Saudi on-demand screen repair), and a multi-branch barber shop management system. [[Laravel](#), [Flutter](#)]

Full-Stack Developer

Jan 2021 – Oct 2021

Josequal • Amman, Jordan

- ▶ Fast-paced startup environment delivering web and mobile platforms across multiple verticals including banking, e-commerce, hospitality, and QSR.
- ▶ **Al Rajhi Bank (Saudi Arabia)** — Internal real estate & asset management system for Al Rajhi Bank — the world's largest Islamic bank (\$216B in assets, 19M+ customers, 20K+ employees, 10 branches in Jordan). [[Angular](#), [Laravel](#)]
- ▶ **RivageCare (rivagecare.com)** — Magento 2 e-commerce platform for one of Jordan's largest Dead Sea skincare brands (50K+ followers, international shipping). Still in production. [[Magento 2](#), [PHP](#)]
- ▶ **Additional Platforms** — Da Farm (chalet booking with real-time availability), a React Native mobile app for the Saudi market, a school management system, and OpenCart + Flutter e-commerce integration. [[React Native](#), [Flutter](#), [CodeIgniter](#), [OpenCart](#)]

Backend Developer

Dec 2017 – May 2020

Qiotic • Amman, Jordan

- ▶ Sole backend developer in a 6-person product team, supporting 5 frontend/mobile developers across multiple parallel client projects.
- ▶ **SMORTEC — B2B Pharmacy Supply Platform** — Designed and built the entire backend and admin dashboard for a B2B pharmacy supply platform: restricted access, manual approval workflow, tiered pricing, 24–72h fulfillment. Live on the Apple App Store. [[Laravel](#), [MySQL](#)]
- ▶ **Additional Platforms** — Bolisati/Polixa (auto & general insurance, policy lifecycle & quoting), Delico.store (multi-vendor e-commerce), and Kick.jo (real-time sports facility booking). [[Laravel](#)]

EDUCATION & RECOGNITION

 **2nd Place — 3rd Crown Prince Award for Best Government Services Application** February 2024

Won 30,000 JOD prize for "Masar" — a university guidance platform helping Jordanian students choose majors and universities. Co-developed at Applied Science Private University. National recognition by His Royal Highness the Crown Prince.

Bachelor's Degree in Software Engineering

[Applied Science Private University — Amman, Jordan](#)
